

Management of jobseeker CV (resumé)

Assignment specifications: Design and develop web-based application where jobseekers can post and then view a CV (or resumé) online.

User roles:

1. Jobseekers
2. Viewers

Role of the Jobseeker

- Post a CV
 - With a form
 - (*Optional*) Upload a CV in pdf file

Role of the Viewers

- View a CV by specifying a CV URL in address bar
 -

Steps to do:

- Suggest the *good structure* of a CV. Jobseekers can input address(es), phone(s), degree(s), certificate(s),
- **Design a database** to store information input from jobseekers
- Create a **form** for the jobseekers to input data.
- Store all the jobseeker data in database
- Show specific CV on screen by CV_id
- Create URL address for specific CV containing CV_id
- Later you can share your CV with other people with a URL, i.e. http://abc.com/CV_id
- You can authenticate the viewers, who can and cannot view your CV.

Delivery:

- Upload a compressed file, containing all source codes (html, css, js, ...), exported file databas *.sql, captured pictures of your webapp.
- Present your webapp in the class in the last LAB work hours.
